Taverham Conservatories & Windows

For all your home improvements

Introducing

Established in 1985 by proprietor David Collier. Taverham Conservatories has, through steady expansion developed into a well respected company with a reputation for high quality at fair prices.

Unlike most companies in this field, we specialise in conservatories & orangeries and as a result, our staff have a wealth of experience to offer. Additionally, we can also supply a full range of replacement windows, doors & extensions, all available in the same choice of colours and materials.

Our commitment to quality ensures our customers receive the best service throughout. Using our dedicated computer aided design system we can produce a conservatory to your exact requirements. We employ our own fitting teams, as to maintain control, quality & continuity at every stage of the installation process. This is supported by an excellent after-sales service and backed by a comprehensive 10 year insurance backed guarantee.

Although subject to constant upgrading, we pride ourselves on the high level of specification we offer as standard on our conservatories, much of which is often charged as 'extras' by our competitors. Particular attention is paid to insulation and ventilation - for all year round comfort, security and safety - for total piece of mind. These points are often overlooked by less experienced companies, in their quest to beat our prices. We have been specially selected by Ultraframe to be Norfolk's only registered Ultra installer.

We realise, of course, that price is an important consideration to our customers, which is why we keep our prices so competitive. We believe, however, that' Value for money' is even more important and with a Taverham Conservatory, you can be sure you will always be getting the very best 'value for money' and that's a promise.

"Very pleased indeed with the service and results" Mrs Piloni - 18/01/2013

EVERY HOME IMPROVEMENT NEED UNDER ONE ROOF

Established in 1985, Taverham Conservatories & Windows believe in high quality products and service as you can see from our glowing reviews. It is not just about conservatories, orangeries, windows, doors and your roofline. We have a sister company, Taverham Building Services that take care of building renovations and alterations with expert builders and surveyors.

We design, manufacture and install our products in-house so no shoddy sub-contractor. Contact us or pop into our showroom in Taverham, near Norwich to see what we can do for you. We're customer service award winners at the CPA (Consumer Protection Association) for your peace of mind. All our products come with a 10 year guarantee so look no further for home improvement.

SETTING THE STANDARDS

Quality of installation is assured as we're Ultra Installer certified and FENSA registered.

Our Ultraframe system is BBA (British Board of Agreement) certified to show that as manufacturers of products and systems to the construction industry we are tested and approved for quality.

"Had full set of new windows and doors by these guys. Great service. Great product. Wouldn't hesitate to have them do further work or recommend to others." Mrs Handley - 09/02/2015

ORANGERIES & GARDEN ROOMS

Enhance your home

The LivinRoom Orangery is the latest addition to Ultraframe's Orangery range of home improvement products.

ultraframe

Transforming light and space

The LivinRoom Orangery is the best of both worlds, combining light and sky of a conservatory with the walls and ceiling of an extension.

orangeries

An orangery or orangerie was a room or a dedicated building on the grounds of fashionable residences from the 17th to the 19th centuries where orange and other fruit trees were protected during the winter, similar to a greenhouse or conservatory.

The orangery provided a luxurious extension of the normal range and season of woody plants, extending the protection which had long been afforded by the warmth offered from a masonry fruit wall.

A century after the use for orange and lime trees had been established, other varieties of tender plants, shrubs and exotic plants also came to be housed in the orangery, which often gained a stove for the upkeep of these delicate plants in the cold winters of northern Europe. As imported citrus fruit, pineapples and other tender fruit became generally available and much cheaper, orangeries were used more for tender ornamental plants.

The orangery originated from the Renaissance gardens of Italy, when glass-making technology enabled sufficient expanses of clear glass to be produced. In the north, the Dutch led the way in developing expanses of window glass in orangeries, though the engravings illustrating Dutch manuals showed solid roofs, whether beamed or vaulted, and in providing stove heat rather than open fires. This soon created a situation where orangeries became symbols of status among the wealthy.

Today the trend is returning again for stylish, fashionable orangeries, especially now when the technology in high performance glass means that you can have an all year round room, adding much more space and light to your home.

Traditional Orangery designs will give you added class and security. An Orangery by Taverham Conservatories gives you the perfect mix of a sophisticated extension with the natural light of a traditional conservatory.

An Orangery can offer more privacy than a conservatory, with more brick work and interior pelmet, whist the glazed lantern allows for natural light to flood into your home.

Today's Orangeries, like conservatories, are generally buildings with glazed sides and brick supports. Orangeries use less glass than modern conservatory styles. The traditional orangery is the ultimate in home improvement.

For those wanting a modern take on an atrium roof. An Orangery by Taverham Conservatories is the perfect option to bring light and an immense feeling of space into an adjacent room.

In fact, with an Orangery, you are blurring the margins between home and glazed extension.

Externally the Orangery features a flat roof around the perimeter along with a structural grade aluminium roof, capped and clad with low maintenance PVC cappings and claddings.

CONSERVATORIES

Add space & light to your home

design range

TAILOR MADE SOLUTIONS

Any shape of conservatory can be fitted to your home by means of a box gutter. This clever device permits surface water to be drained away from the roof of your home and the rear of your conservatory.

All without the need for major structural alterations to either your roof or adjoining wall.

LEAN TO

For properties with little room under the eaves or for those homeowners that prefer a clean simple look, a lean-to conservatory is the idea choice. The pitch of the roof can be varies, making this a versatile and ever-popular style option.

"Had these build me a conservatory. It's way and above what I expected, the quality is superb...." *Mr Massingham - 01/10/2014*

GEORGIAN

Create more living space by combining your garden room with a Victorian or Georgian extension - which can be placed at one or both ends or even around corners. Then choose roof shapes, bricks, windows and doors to enhance the overall look of your home.

GABLE

A gable-fronted conservatory adds a sense of grandeur to any home. Featuring the same rectangular floor space as a Georgian, a Gable offers excellent use of internal space.

The front panel of the roof remains upright rather than sloping back to the centre as on a Georgian - this creates a feeling of greater height within the conservatory.

VICTORIAN

A popular style distinguished by a faceted front, giving a curved appearance. The number of facets can vary and the more facets there are, the more curved the end of the conservatory will appear.

A Victorian style conservatory is particularly suited to period properties but its clean lines make it a winner on any type of home.

ITALIAN INSPIRATION, BRITISH INNOVATION

Externally the Loggia is beautiful, enhancing any home with ease. The Loggia columns create a wonderful look and feel that enhance both old and new properties alike.

The Loggia system allows for a light, bright and airy interior that will add a new dimension to your home and provide a seamless link between your home and garden.

CREATE A LIVING SPACE AS INDIVIDUAL AS YOU ARE.

The Loggia aluminium columns are sufficiently insulated, giving you a living space that can be used 365 days a year. The aluminium columns are designed to keep the room cooler in the summer and warmer in the winter, reducing you heating bills by up to 30%, when compared to a standard conservatory.

The columns can be full height or made to sit on a low wall. They can also be incorporated with a dwarf wall or full height frames for an ultimately personalised look and feel.

A MULTIFUNCTIONAL HOME EXTENSION

The LivinRoom is the best of both worlds, combining light and sky of a conservatory with the walls and ceiling of an extension. The system can be used in a range of shapes from Victorian and Georgians to Lean-to and Gables.

With improved thermal efficiency than a conservatory, the Livinroom allows you to live more comfortably. To further enhance the usability of the LivinRoom Orangery, down lighters and speakers can be built in to the perimeter roof, so the homeowner can truly stamp their mark on this living space.

If you are looking for a modern, contemporary crossover between a conservatory and extension then the LivinRoom is the system for you.

A BRIGHT IDEA

Installed on a new build extension, Orangery, or inserted into an existing flat roof, an UltraSky roof light will help you add the feeling of space and natural light to your home.

Whether it's for a living room, dining room, kitchen, bedroom or bathroom the UltraSky roof light will be the perfect stylish solution for you.

"Excellent company, do 1st class work with friendly staff. Fitters were friendly from the start of the job, left everywhere clean and tidy. Thoroughly recommend the company." John Norman - 12/09/2014

GET THE WOW FACTOR

Choose the stylish White PVC option to match your modern window frames, or for that extra "Wow" factor go for the Aluminium option, available in White, Anthracite Grey or Satin Black. The highly thermally efficient glazing options will help reduce heat loss and noise pollution, whilst letting the desired amount of light into your room.

REDISCOVER YOUR CONSERVATORY

Our tiled roof system is designed for both new structures and as a replacement roof on existing conservatories as well. The u-value of 0.18 allows you to enhance your enjoyment of your conservatory by keeping cooler in the summer and warmer in the winter. What was once a room usable for a few months of the year can be easily transformed into a room you can use all year round.

Our tiled roof system enables you to regain your privacy whilst being at least 5 times more energy efficient than a glass roof. Comfortable and private - what more could you want?

"Everyone was an expert at what they did and took pride in the job and worked amazingly hard and cheerfully, which wasn't easy with some of the weather we had! Your products and workmanship are first class. Last but not least you have been so helpful and efficient keeping me informed and sorting out any queries promptly... stress reduction at a maximum! Thank you." Mrs Hamilton - 17/04/2016

PERSONALISED BOTH INSIDE & OUT

Choose from a range of coloured lightweight tiles and slates. For added light and ventilation, velux type windows are available.

For that smooth modern internal look the plastered finish is the most popular although PVC cladding or timber finishes give your conservatory that more individual look and feel.

roofline

"We thank your company and your fitters for a first class job. Well done." **Mr & Mrs Vyse - 26/02/2013**

PROTECT YOUR HOME WITH A NEW ROOFLINE

Your roofline is there to protect your home from the elements. Fascias, soffits, guttering and downpipes are all designed to prevent water damage. Over time they can take a battering, especially if they are older fascias and soffits. If they are damaged then they won't be doing their job. This can be potentially disastrous for you home and end up costing you lots of money. Be safe and **contact us** for new and replacement roofline products that will be installed by the experts.

IMPROVE THE LOOK OF YOUR HOME

An attractive roofline will also add to the look and value of your home. People will be put off if they see cracked guttering or damaged fascias and soffits. You can rest assured that the products we use are of high quality and maintenance-free PVC so that will save you time in the future. Just a quick wipe and they will look as good as new.

DOORS & WINDOWS

Personalise your home

www.taverhamconservatories.co.uk

doors & windows

COMPOSITE DOORS

Composite doors are the newest type of door used in homes. Composite doors have been designed taking into consideration the common flaws experienced in singular material doors. Using a combination of materials which have been selected for their beneficial properties.

Our composite doors are 44mm thick and with its super-strong structural frame our composite doors not only look great but are more secure than ever.

With 21 different designs to choose from available in a wide variety of colours, there's a composite door for everyone!

"We bought a new composite door from Taverham Conservatories and have been absolutely delighted from start to finish. Fantastic customer service, friendly and hardworking tradesmen and a great after care service. What more can you ask for from a company." **Mr & Mrs Allen - 25/01/2016**

Enhance your home by choosing from our superb range of windows and doors. You are sure to find something which will compliment the style of your home perfectly.

Our heritage style windows and doors reflect the style of bygone ages whilst fulfilling the 21st Century standards of insulation, Health & Safety and home security.

PVC DOOR

Whether you want to enjoy the view or divide two rooms, with a little flair and style, our French, patio and bi-fold doors provide the answer. All you have to do is decide which route is best for you.

FRENCH DOORS

French doors are the classic solution. They open wide to the outside and today's PVC-U models provide superior thermal and security performance. We can add side panels for larger spaces.

BI-FOLD DOORS

Bi-fold doors fold back concertina style. Choose from 18 different styles or permutations, based on up to 6 leaves. Suitable for internal or "good to moderately exposed" external locations.

PATIO & SLIDING DOORS

With their large glazing area, these are perfect if you want to enjoy the view. Up to 4 panels can be incorporated into our easy glide opening system for a secure, warm, space efficient solution.

FINISHES

You can order all of our doors in a wide range of colours in both uPVC or Aluminium.

To see our vast range of doors and windows, please visit our website **www.taverhamconservatories.co.uk**

PRODUCTION, PLANNING & FINISHING TOUCHES

TAVERHAM CONSERVATORIES SHOWROOM

Our qualified sales, surveyors and installers have many years of experience in the business so you can be sure of a fully professional service.

A ARA

We pride ourselves in providing a tailor-made service from obtaining full planning approval (making use of our computer aided 3D design visuals), through to successful completion.

We assemble our own roof and frame structures using the Ultraframe system approved by the **British Board of Agreement**, this is a Government backed department which assures that each roof has a life expectancy of a minimum of 25 years. Taverham Conservatories are the only requested Ultraframe approved fabricators/installers in Norwich.

In 2002, **Sure Frames** was added to our company's manufacturing base, enabling us to provide everything in-house. In addition to firstclass workmanship and materials, our company has an excellent record of customer care. In fact, customers' commendations have helped us to scoop top awards from the **Consumer Protection Association**. As members of the Association, every single customer is asked to complete a quality assessment questionnaire. A current survey shows that 98% of our customers were very satisfied and a large percentage said that we were excellent!

Customers are welcome to visit, phone or use our web contact form to obtain more information or a free quotation.

We supply everything necessary to complete your new conservatory such as plastering, electrical lighting and sockets, plumbing in radiators, choice of floor finishes from tiles to wood laminate, cane furniture, blinds, remote control fans and even under floor heating!

Our aim is to take away the stress so that all you need to do, is decide what style of conservatory you would like and whether you want it to be a family room, office, sun lounge, garden room or dining room. Finally, we offer total financial solutions from our house Broker, written details supplied on request. "The installation team were excellent and worked very well as a team. Very cheerful and friendly even when it poured with rain" **Mr Hill**

Taverham Building Services

HOME EXTENSIONS AND CONVERSIONS

Taverham Construction will take care of your home extensions, garage conversions and building design alterations. Our fully qualified tradesmen will look after building design projects and manage the entire thing so you don't have to worry. We'll take the stress out of it for you by managing every step of the way from initial drawings through to completion. Contact us to discuss your needs.

We can design and install garages, garage conversions, patios, extensions, porches, kitchens, bathrooms, garden walls, tile roofing, car ports, driveways, conservatories and orangeries.

FIRST CLASS DESIGNS AND PLANNING

With the use of computer aided 3D design visuals we'll come up with a stunning design for you. Whether it is for a home extension, garage conversion, conservatory or orangery we'll do the design so that you can see what it'll look like completed and obtain the necessary planning permission. We assemble everything and install it to a high level to make sure you get the best possible service.

O		
Care		
115	banatories	

"It's unwise to pay too much, but it's worse to pay too little.

When you pay too much, you lose a little money - that is all.

When you pay too little, you sometimes lose everything, because the thing you bought was incapable of doing the thing it was bought to do.

The common law of business balance prohibits paying a little and getting a lot - it can't be done.

If you deal with the lowest bidder, it is well to add something for the risk you run, and if you do that you will have enough to pay for something better.

There is hardly anything in the world that someone cannot make a little worse and sell a little cheaper, and the people who consider price alone are that person's lawful prey."
